- ◆ Blinds should be closed during the heat of the day.

- ◆ For improved performance of the unit, filters should be cleaned or replaced every 3 months.

Heating

Similar to air conditioning, the heating unit of your apartment operates most efficiently when it remains at a single setting. It is recommended that blinds remain open during the winter to take advantage of the sun's warmth. All furniture should be at least six inches away from the heating unit and remain dust free.

Plumbing

Virginia Village's sewage system is adequate to handle normal drainage. However, care must be taken by not disposing paper towels, facial tissue, disposable diapers, sanitary napkins and disposable tampons in the commode. Care should also be taken to avoid dropping foreign objects in the commode (i.e. combs, deodorant cans, etc.).

If your apartment has leaking pipes or water faucets, continuously running toilet tanks or no hot water, please report it to the Virginia Village Office for repair.

Countertops

Even though the countertops in your kitchen and bathroom are of durable high-grade material, they can still be damaged by heat, staining or cutting with knives or sharp objects. Spills should be wiped up promptly and thick pads should be used under hot dishes and pans. Never cut food or any other item directly on your countertops.

Disposals

If used properly, your kitchen sink disposal unit is a trouble-free unit. The cold water should be running as fast as possible any time the disposal unit is in use. Leave the water running for a short time after running the unit. This helps clear the lines and avoid back-up problems. If the disposal unit will not start, contact the Virginia Village office.

Do not reach into the disposal unit while it is running.

It is important not to overload the unit. If it does become overloaded the safety overload switch will engage and stop the unit's motor. To reset the overload switch, let the motor cool for three or four minutes

and press the red button on the bottom of the motor under the sink. Please avoid putting the following items in the disposal unit: celery, eggshells, fruit rinds and peels, bones and drain cleaners.
